

Megann McStay

2012-2019

After completing my GCSE's I decided to stay on at Tudor Grange Sixth Form and study BTEC's in Applied Science (Merit) Children's Play and Learning (Merit) and Health and Social Care (Distinction). With the continuous support from the staff I then decided to apply for university and follow my dream of working with children and becoming a primary school teacher. University was not my first choice as I wanted to enter employment but upon guidance from my teachers and family I decided to apply and I am so pleased I did as it now means I can go further in my field with a degree and it will not hold me back in the future. I made lots of new friends whilst studying at the University of Worcester and had the opportunity to experience different educational settings through my placements. The picture was taken in May 2022 of me finally completing and handing in my dissertation. I am now a fully qualified teacher and can not wait to have my own classroom and support and inspire children. I would like to end up specialising in SEND and becoming a Head Teacher one day!
