

Harry Chevassut

2016 -2022

My name is Harry, and I was a student at TGAW for seven years. During my time at TGAW Sixth Form, I studied A-Levels in physics, chemistry and maths and wrote an EPQ about string theory and completed my gold DofE award. I now study Natural Sciences at Clare College Cambridge, with a view to specialise in synthetic chemistry and drug design.

My time at TGAW gave me the opportunity and confidence to study at Cambridge. My time there so far has been both academically challenging and rewarding. I have also cultivated an incredible social environment, surrounding myself with great friends and rowing with Clare Boat Club. Moving forward at university, I will continue to overcome challenges using skills I developed at TGAW, as well as taking on committee roles at CBC. Beyond my degree, I intend to enter a career in scientific research, within a field related to my undergraduate specialism.
