

Megan Doukas

2014 - 2021

When I attended the 6th Form, my chosen subjects were health and social care, criminology and psychology. I always had an interest in these subjects, so they were a good mix for me to study. I chose Tudor Grange 6th Form as I progressed from High School as I wanted a familiar setting. The smaller class sizes were also beneficial as it would be easier to get support if needed. My second year was during covid, which was difficult, but I had support from teachers, even to them coming to the house to drop off completed work with feedback, which enabled me to study hard and get the grades I needed for University.

I decided to go to Worcester University to continue the pathway of psychology and studied Counselling Psychology. Worcester University were amazing with meeting my needs, and supporting me every step of the way.

I am considering doing my Masters next year to develop my learning further.

My main aim for the future is to work within the mental health setting, to become a counsellor, and to help advocate and empower people with all different types of circumstances.
